PROFILE

Associate Software Engineer (Data Science Engineering & Tools) at IELEKTRON Technologies contributing to data-driven solutions and workflow optimization. Experienced in building scalable web and mobile applications, API integrations, and delivering user-friendly solutions. Passionate about building efficient digital products and committed to continuous learning and professional development.

WORK EXPERIENCE

IELEKTRON Technologies - Associate Software Engineer

Aug 2025 - Current

- Engineered core modules of an integrated employee management and skill-mapping platform using React, TypeScript and Node.js backed by Azure Cosmos DB and deployed on Azure App Service.
- Automated key workflows including bulk data uploads, conflict resolution, and billability calculations; overhauled project panels, dashboards, and financial charts.
- Optimized data processing pipeline achieving 93.5% performance improvement (46s→3s), reducing database calls by 99.5% and increasing throughput.
- Streamlining data pipeline orchestration by implementing Docker-containerized Apache Airflow workflows for Drone Telemetry Analytics, enabling automated pipeline management and optimization of Python data analysis scripts.

SUN TV Network - App Developer Intern

Jan 2025 - May 2025

- Developed an On-Duty HRMS mobile application using Flutter (Frontend) and Django (Backend).
- Implemented on-duty workforce monitoring by geo-tagging employee activities with precise location and timestamps at each duty/program stage along with inbuilt map feature.
- Conducted rigorous testing for edge cases (offline use, GPS off, forced stop) and implemented fallback logic for reliable app behavior.

LRDE-DRDO - Summer Intern

May 2024 - July 2024

- Designed and optimized X-band Coaxial Groove Gap Waveguide Power Dividers in HFSS, enhancing high-frequency waveguide performance for radar applications.

EMERTXE - Intern

March 2023 - May 2023

- Simulated an IoT-based Home Automation System using Arduino UNO, PICSimLab, and Blynk IoT to control LEDs, sensors, and water tanks, replicating garden lights, heaters, and coolers.

SKILLS

- | | | |
|--------------------------|-----------------------------|---------------|
| • Python, React | • Apache Airflow | • Node.js |
| • HTML, CSS | • App Development - Flutter | • TypeScript |
| • Django, REST APIs, ORM | • PostgreSQL, MS SQL | • JavaScript |
| • Azure App Service | • Cosmos DB | • Git, GitHub |

EDUCATION

B.Tech in Electronics and Communication Engineering - CGPA: 8.97

Indian Institute of Information Technology, Tiruchirappalli 2021 - 2025

XII (Senior Secondary) - 95.4%

Asian Christian High School, Hosur 2020 - 2021

X (Secondary) - 95.6%

Asian Christian High School, Hosur 2018 - 2019

NPTEL CERTIFICATIONS

- Digital Image Processing
- Pattern Recognition

LEADERSHIP ROLES

- School Captain: 12th Grade
- IoT Club Coordinator: UG
